## Review

"This is the best thing to come out in years! It is exciting that it is available. Simple and to the point. It lends itself to being used in different courses and over a series of course. The (new) videotape is excellent and fits the content well."

"I especially like the new chapter (9) that addresses working with mandated clients. This was a needed addition. I would encourage a colleague to use this text...It is a more helpful, respectful, and empowering way to work with people...I am very pleased with the video you sent. I would prefer this video to the one I purchased previously and would use it to demonstrate skills as well as to generate discussion."

great introduction to SF

By Coert Visser

In the year 2000, this book was my first acquaintance with the solution focused approach to helping people. I had heard from a colleague (who is also a management coach) about solution focused working and, although I thought it sounded promising, I remained a bit skeptical. However, from the very moment I started reading 'Interviewing for solutions' my attention was firmly captured. Two chapters later I was practically sold. The approach is very clearly explained and the many dialogues in the book are really excellent (especially those by Insoo Kim Berg). After reading this book I started reading and learning more and I began using solution focused working in my practise as a coach and consultant. With peasure and success.

Excellent Book on Interviewing--Period!

By Rocco B. Rubino

Although solution focused-brief therapy is considered a paradigm, this book could very well be used in any introductory, microskills class, and it should.

The authors put forth a paradigm that is easy to learn (yet technique is perfected with much experience),and it places focus on the client's "non-problem" life. This is important because what we tend to focus on tends to increase.

The authors present SF in a way that is very empowering to both the therapist and the client. For the therapist who is interested in genuinely helping people, this will work, but you cannot use this approach and have an ego-issue w/regard to being an "expert." Rightly, the client is the expert on his/her own life.

A first-class text, and a keeper!
