Contents exceeded my expectations

By Viv Mostert

A friend recommended the book and although dated, it exceeded my expectations. Just disappointed that a book costing 22c eventually cost me 20 Euros for postage

2 of 13 people found the following review helpful.

Very telling

By J. Ford

This is a very telling book of where certain people in high places in international forums think we should go and what we should do as a whole.

Written in 1972 and with a forward by none other than Maurice Strong, globalist, fear monger, and general enemy of nation states and civil liberties.

These are the people that wish to rule your daily lives for you and I.

Worth the read.

Think the global warming hoax started recently?

Wrong. Read the book.

Wake the hell up America and join the infowar!

3 of 23 people found the following review helpful.

Eco-disaster book which struck me as unduly pessimistic

By mark.nelson@med.monash.edu.au

I read this as a required reading at high school and am interested in rereading it as I think futurologists do not have their predictions tested.
