SECRETS OF THE LOST RACES: NEW DISCOVERIES OF ADVANCED TECHNOLOGY IN ANCIENT CIVILIZATIONS BY RENE NOORBERGEN PDF

An increasing number of historical and archaeological finds made around the world have been classified as "out-of-place artifacts" (ooparts). They have been called this because they appear unexpectedly among the ruins of the past with no evidence of a preceding period of development; their technological sophistication seems far beyond the capabilities of ancient peoples.

Drawing on the literature and art of the Chaldeans, Sumerians, Babylonians and others, Rene Noorbergen's contention is that a superior race of man was responsible for these scientific marvels that bear testimony to a civilization with technology comparable to our own.

A fresh and believable read

By R. Medd

Finally a book about the amazing accomplishments of the ancients that doesn't make references to extraterrestrial beings or throw out biblical accounts! Rene actually blended the secular with the biblical very

nicely. He packed a lot of evidence into the book. I initially checked it out from the library, but then ordered my own copy because it has so much that I know I'll want to refer back to many times.

Secrets of the Lost Races: New Discoveries of Advanced Technology

By Drago Breluh

This is a small book, easy to read, & fascinating.

The author draws a long bow at times in presenting the material, but very entertaining and provided food for thought.

I would have preferred a used paperback copy to keep the cost down but none appeared to be available at the time.

Nice little hard cover that would make a curious gift to atheist, Christian, agnostic or even a Sci-Fi reader , and if left on the coffee table would definitely inspire an animated discussion amongst guests.

Warning!

he first thing you **MUST** do is pen your name and phone number inside the front cover because anyone who picks it up off your coffee table will want to borrow it!

Excellent read outside the normal historic record which has been ...

By S K Findsen

If a person is interested history, this book by Mr. Noorbergen is very well done. He states the facts and evidence and lets the reader draw there own conclusions. He does make statements such as: "Given the evidence, we can logically conclude...." And in places he states his opinion, but labels the opinion as such. Excellent read outside the normal historic record which has been colored and presented with many a bias.
