During his time as a professor, the author has learned that although most university students are smart and capable, many of them go about their educations in a fashion that does not lead to success. This is because knowing what it takes to do well in college is never learned in high school, and really, it is never explicitly taught in college either. There are simple formulas for doing well in school and this book was written to give readers some of the keys to academic excellence.

"So, You Are Going to College?!" (Second Edition) is a fun read, as the author's own research points to the notion that the more you like a class the more you: learn, are motivated to learn, are satisfied with your communication with your teacher, and participate in class. By reading this book, you will learn some of the expectations professors have of their students and you will learn some of the behaviors you need to perform if you want to do well in college.

This enjoyable, yet brief and to the point, book includes:

- A look at some of the myths students have about professors and about college in general.
- Discussion on the number one rule for success in life, being an adult.
- Some of the expectations professors have for their communication with students.
- How to listen effectively in class, a guide to help students learn more and daydream less.
- The formulas for doing well on exams and helping students become aware of their goals in college.

San Bolkan earned a PhD in Interpersonal Communication from the University of Texas, Austin, in 2007 and is currently a faculty member in the Department of Communication Studies at California State University, Long Beach. He has taught a variety of courses including Communication Theory, Interpersonal Communication, Communication in Close Relationships, Public Speaking, Corporate Communication, Communication Training and Development in Organizations, and Risk, Crisis, and Interagency Communication. His research focuses on both applied communication and instructional communication with works published in a variety of peer-reviewed outlets including the Journal of Applied Communication Research, the Journal of Instructional Psychology, Basic and Applied Social Psychology, the Journal of Classroom Interaction, and Communication Education.

Educational and Fun - Best Quick Read for Every College Student

By Communication Ninja

I use San Bolkan's book, *So You Are Going to College*, for all of my college courses. It creates a great fun and fast supplemental reading that the students can relate to and it is a way for them to learn important lessons. I have had students scoff on the first day when I tell them about one more book they have to buy (& read)--but when I tell them I will buy it from them if they don't like the book they are floored...and I have yet to have to write any checks to back up my guarantee. :) Bottom line, I have assigned this book to over 500 college students, given it to family friends graduating from high school, and read it numerous times myself for class discussion. It only gets positive reviews and it always leaves the reader wanting more of San Bolkan's writing.

Very Useful

By B. Sun

The book is very interesting, introduces many tips and tricks both in school communication and academic learning! Really hope the author can write another book for graduate students!

Highly recommend!

A comedic, informative, & easy read =]

By allison

This book is a great way to introduce students to college, its expectations, and ways to be prepared.

There are TONS of books out there which aim to inform collegians about, "how to help themselves," or "do school the right way," but let's face it...most of those are BORING.... THIS ONE is NOT.. its quite the opposite.

its cheap, funny, informative, AND YOU'LL ACTUALLY WANT TO READ IT.
