The Great War is a landmark history that firmly places the First World War in the context of imperialism. Set to overturn conventional accounts of what happened during this, the first truly international conflict, it extends the study of the First World War beyond the confines of Europe and the Western Front.

By recounting the experiences of people from the colonies especially those brought into the war effort either as volunteers or through conscription, John Morrow's magisterial work also unveils the impact of the war in Asia, India and Africa.

From the origins of World War One to its bloody (and largely unknown) aftermath, The Great War is distinguished by its long chronological coverage, first person battle and home front accounts, its pan European and global emphasis and the integration of cultural considerations with political.

Innovative, comprehensive, notices (more than notices) that the war was waged outside Europe as well as in.

The Great War from a different perspective

By Jeremy B. Wilgus

Dr. Morrow's most recent work is a must read for those interested not only in the European theater of the Great War, but the colonial conflicts as well. It is more than a military history, for the work touches on race, society, the bias of imperialism, and the contributions of colonies to the conflict in Europe. I am certain this book would be useful to professional historians, however it is accessible and thought-provoking to the layman as well. An excellent read, and a fine addition to Morrow's earlier works on air power in the Great War.

Excellent Scholarly Reexamination of WWI

By J. Manglitz

This work is as innovative as it is thorough with detailed examinations of previously unexplored themes as well as novel interpretations of common topics. Morrow's ideas and postulations are well argued and meticulously supported throughout the book. His style is engaging yet accessible, scholarly but unassuming. I highly recommend this work to anyone interested in academic military history and especially to those concerned with the history of colonization and imperialism.
