For this reason the volume contains the majority of the contributions. It should provide the linguistic community with a comprehensive work presenting the state-of-the-art in Greek Linguistics and covering a wide multidisciplinary spectrum of current research. The papers are organised into six sections. Section I contains the papers of the four invited speakers. George Babiniotis discusses the contribution of linguistic theory to the teaching of Greek, Dimitra Theophanopoulou-Kontou and Angeliki Malikouti-Drachman each present an overview of the relevance of, respectively, syntactic and phonological theories to Greek, and Brian D. Joseph explores a specific theoretical issue, the pro-drop parameter. Section II brings together papers on syntax, semantics and pragmatics which examine theoretical and descriptive issues within current models such as Principles & Parameters, HPSG, Relevance Theory and others. Section III covers phonology and phonetics and also presents research on theoretical issues such as government phonology, the phonology-morphology interface, as well as descriptive issues including the instrumental investigation of selected phonetic phenomena. Section IV covers discourse and style and deals with spoken and written discourse including miscommunication, metaphor and issues on politeness. Section V on variations and extensions consists of papers on Ancient and Modern Greek dialects such as Macedonian, Cypriot, and Pontic, as well as issues on social and geographical varieties, diglossia and language acquisition.
