Velocity Instant Fluency - The Ultimate System for Fast Fluency in any Language

What is Instant Fluency? Is it possible to bypass the years of struggle, and engineer that single moment when a new language clicks and communication becomes natural?

Crack the Code on Fluency: When you learned your first language, as a 2-year-old, did you memorize grammar rules? Why can't you learn your new language that way?

The Ultimate System for Fast Fluency: Velocity is not a single tool or idea. It is a complete system that has been tested and proven with thousands of people over the past 20 years.

Model the Man who Speaks 42 Languages: In 1985, Powell Janulus was entered into the Guinness Book of World Records for fluency in 42 languages. Powell could often demonstrate beginner fluency in any new language with just a few hours of practice. The Velocity team spent 7 years researching his ability and developed the model that everyone is using for accelerated language learning and instant fluency. Fun: Language fluency is like eating ice-cream... If you're not having fun, you're doing it wrong. Your accelerated learning capacity will not turn on unless you are relaxed. Fun is the best way to get there.

Easy: There is always an easier way, you just have to find it. Your learning system loves multilayered games. Take a kid's game like hopscotch. This includes counting, singing, melody, rhythm and repetition. This is a peak learning activity. Velocity turns the most difficult grammar rules into easy games.

Fast: The Fast Track to Fluency: Each of the 12 Velocity ideas and tools opens a door to fast fluency. Together they form a comprehensive system. Take the top two tools in Velocity, Intoning, and Enchanting and play with them every day for 30 days. You will experience a breakthrough in fluency.

Is there a fast and easy way to language fluency?

In 1985, Powell Janulus was entered into the Guinness Book of World Records for fluency in 42 languages. He could often show beginner fluency and comfortably converse in a new language in just a few days.

How was this possible? Did he have a unique gift, or was his ability something anyone can do? Marilyn

Atkinson, Ph.D., spent 7 years researching Powell's unique abilities and developed a system that would allow anyone to accelerate their language learning. Paul Gossen refined this into the Velocity model for Instant Fluency in any language.

Velocity is based on an advanced experiential learning methodology that embeds sophisticated accelerated learning approaches into simple ideas, actions and games.

This methodology has been refined over 20 years by Marilyn Atkinson and has been intensively developed by Paul Gossen. The process has been tested by everyday people around the world and is supported by a community of raving fans.

What if you could Learn a Language like a Two-Year-Old? Velocity Language Learning shows you how to stop struggling with traditional language learning and step back into your natural learning system. What if you could emerge into your new language in a completely automatic way, without any hard work. Imagine being able to confidently talk with anyone anywhere in the world. Imagine being able to instantly communicate in any language in just a few days. Welcome to Velocity.

Break the Language Barrier: How is it possible that most humans cannot communicate with most other humans? In today's world of free communication and instant travel, this barrier of language is unacceptable.

Easy Language Learning is a basic human right.

This Book was Written with a Single Aim:

To create peace on earth by making easy language learning a basic human right.

'Language fluency is never done! You will always be learning.'

By Grady Harp

Anyone who has read and incorporated Paul Gossen's BUSINESS TRANSFORMED knows what to expect from reading this new book he has coauthored with Marilyn Atkinson - learning new skills with as much comfort and ease as possible when approaching a new subject. This time around he addresses language fluency - why do small children learn to speak the household language without textbooks or rules? Instant fluency explains how that happens and how we can apply it to our learning new languages quickly and with facility and fluency. 'Velocity turns the most difficult grammar rules into easy games.'

What the authors term the 12 point Velocity Model they outline in single words that beg exploration of their method: Mindset, Intuitive, Sticky, Missioning, Intoning, Enchant, Become, Fun, People, Mapping, Confidence' and Every Day. Sound strange or far too tangential? Then read this book and take the steps and see how naturally it works.

For example, under 'Mindset' - Love Making Mistakes: This is a key idea in Velocity. It is an easy concept to grasp. However, in practice, it can be a challenge to sustain. Most people actually don't like making mistakes. The thought of attempting to speak your new language to a stranger and making a whole bunch of mistakes is quite intimidating. So how do we get around this? We need one more super-powered tool: 'The Silly Hat'. Around the world, you will see people attending Velocity- events wearing silly hats and crazy wigs. Why all the silly hats? Is this some silly gimmick to embarrass people and get attention? The answer is YES. The point is that wearing a really silly hat is so ridiculous and embarrassing that no one will take you seriously. Once you have dealt with the Velocity peer pressure and put on your silly hat, you will be so far past the point of caring about making a few grammar errors in your new language that you really won't care. You might even notice that you are having a lot of fun making mistakes! Around the world, at the beginning of every Velocity event and exercise, we say "Everyone, put on your silly hat." This is the easy way to love making mistakes. There is a deep connection to the brain science of how the silly hats work. Recent fMRI neuro-imaging studies have demonstrated that people learn best when they are relaxed and able to access many parts of the brain and many learning systems. In contrast, noticing an error or making a mistake can only take place using the Reactive System of the brain. This is the part of the brain that 'reacts' to danger.'

And on it goes with each of the 12 points of the Velocity Model. Strange openers: sound thoughts and teaching tools. The authors end up with the Four Quadrants of learning - Passive, Active, Group and Social - and by this time (we are in the 'Every Day' point of the model) we are having more fun than stress and finding that we are indeed learning the Velocity method.

For more than this cursory introduction to a very learned yet practical book the readers must read for themselves. It is one of the strongest courses in learning a new language (and more entertaining) than is available elsewhere. Add to this the visual images and graphs and just funny photos and you have a total winner of a book, verstehen Sie? Highly Recommended. Grady Harp, February 15

"Velocity - Instant Fluency" - is a proven system that works for me!

By C Hogg

Velocity - Instant Fluency" - is a proven system that works for me!

I am a successful business woman over many years now. I am also a "Cultural Entrepreneurial Explorer" - with a passion for international travel and in finding ways to connect our global family as one. I love language and real communication!

When I was first introduced to "Velocity - Instant Fluency" in 2013 - I had always dreamed of being able to communicate in different languages in other cultures. I wanted a way to develop a true connection - to try to begin to better understand other cultures - with a possibility of better tolerance, understanding and peace. I had tried several times to learn different languages in various ways. Finally - after 2 days of on-site training with "Velocity - Instant Fluency" - I was beginning to do this! I had experienced a process that enabled my brain to relax and to begin to intuitively learn. I was also taught a system that I could begin to use wherever I travelled in the world - to be able to really connect and communicate with people!

I would highly recommend this book - "Velocity - Instant Fluency" - for anyone who wants to be able to really and clearly communicate with other's, to be effective and efficient in their communication, to feel relaxed and confident in communicating and to feel genuine and authentic in their communication. This "Velocity - Instant Fluency" method can be applied personally, within families and communities wanting to learn a new language and/or to revitalize their native language, while travelling nationally and internationally and within global businesses and corporations who want to enhance their business communications worldwide.

I am using "Velocity - Instant Fluency" in some of these area's now – and I look forward to applying this method in other ways too!

C. Hogg

You won't get language fluency from reading this book.

By Michael J. Edelman

I was emailed a digital copy of this curious book, unsolicited, with a request that I review it. It's a collection of principles that are to be applied to learning languages, presented in an attractive manner, and indeed all are good principles, not just for learning language, but for learning in general: Don't obsess. Relax. Try to use multiple modalities and multiple associations to reinforce learning. These aren't new ideas, of course. What you won't find here is a specific program or methodology for learning any particularly language. For that, you have to go to the author's web site, where you'll be directed to a selection of four-day English language fluency courses you can enroll in at a cost of \$500. In short, then, this is not a guide to learning languages, but a 160 page sales brochure for a training program.
